Product KETTLE DESCALER

Revision date 21 October 2020

Revision 2

Safety Data Sheet (SDS)

according to Regulation (EC) No. 1907/2006

Section 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name KETTLE DESCALER

Product no. 403

Synonyms, Trade names No information available.

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses Hard water scale remover (Professional Use Only).

Uses advised against Any other purpose.

1.3 Details of the supplier of the safety data sheet

Supplier Kitchenmaster NI Ltd

11 Comber Road

Belfast BT8 8AN United Kingdom Tel: 028 90814777

Contact person sales@kitchenmaster-ni.com

1.4 Emergency telephone number

Emergency telephone Emergency Telephone Number: 028 9081 4777 08:30 – 17:00 Monday to Thursday 08:30 –

16:30 Friday

Section 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (EC 1272/2008)

Physical and chemical hazards Not classified
Human health Skin Corr. 1C - H314
Environment Not classified

2.2 Label elements

Contains phosphoric acid

Detergent labeling ≥15% <30% Phosphates <5% non-ionic surfactants

Label in accordance with (EC) no. 1272/2008

Signal word Danger

Hazard statements H314 Causes severe skin burns and eye damage.

Precautionary statements Prevention

 $P260\ Do\ not\ breathe\ dust/fume/\ gas/mist/vapours/spray.$

 $P280\ Wear\ protective\ gloves/\ protective\ clothing/eye\ protection/face\ protection.$

Response

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

 $P303 + P361 + P353 \ IF \ ON \ SKIN \ (or \ hair): Remove/Take \ of fimmediately \ all \ contaminated$

clothing. Rinse skin with water/ shower.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing. P310 Immediately call a POISON CENTER or doctor/physician.

2.3 Other hazards

None known.

Section 3: Composition/identification of ingredients

3.1 Substance

Not applicable.

3.2 Mixtures

Name	Product identifier	Regulation (EC) No 1272/2008	%
Inhoenhoric acid	CAS-No.: 7664-38-2 EC No.: 231-633-2	Skin Corr. 1B - H314	20-30%

The full text for all hazard statements are displayed in section 16.

Composition commentsThe data shown are in accordance with the latest EC Directives.

Section 4: First aid measures

Skin contact

4.1 Description of first aid measures

General information Provide general first aid, rest, warmth and fresh air. As a general rule, in case of doubt or if

symptoms persist, always call a doctor. Seek medical attention for all burns and eye injuries, regardless how minor they may seem. First aid personnel must be aware of own risk during

rescue.

Inhalation Remove person to fresh air and keep comfortable for breathing. If not breathing, give

artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.

Ingestion If this product is ingested, remove victim immediately from source of exposure. Rinse mouth

thoroughly. Do not induce vomiting. Provide fresh air, warmth and rest. Get medical

attention. Never give anything by mouth to an unconscious person.

Remove victim immediately from source of exposure. Remove contaminated clothing, shoes and jewelry and wash before reuse. Wash the skin immediately with water. Get medical

attention if symptoms persist.

Eye contact Do not rub eye. Avoid contaminating unaffected eye. Remove contact lenses if present and

easy to do so. If this product contacts the eyes, gently flush eyes with water for at least fifteen (15) minutes, lifting the upper and lower eyelids occasionally. Seek medical attention.

4.2 Most important symptoms and effects, both acute and delayed

General information The severity of the symptoms described will vary dependent on the concentration and the

length of exposure.

Inhalation May cause respiratory irritation.

Ingestion Ingestion can cause pain and irritation or burns of the mouth, throat, oesophagus and

gastrointestinal tract.

Skin contactCorrosive! Can cause redness, pain, and severe skin burns.Eye contactCorneal burns may occur. May cause permanent damage.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to the physician Treat symptomatically.

Section 5: Fire-fighting measures

5.1 Extinguishing media

Extinguishing media Use fire-extinguishing media appropriate for surrounding materials. Foam, dry powder,

carbon dioxide (CO2), water spray.

Unsuitable extinguishing media High volume water jet.

5.2 Special hazards arising from the substance or mixture

Hazardous combustion products When heated, toxic and corrosive vapours/gases may be formed. Combustion may lead to the

release of oxides of carbon and oxides of phosphorous.

Unusual fire & explosion hazards

Specific hazards

Acid will react with active metals to produce flammable hydrogen.

In the event of damage to packaging, floors may become slippery, avoid falls. Do not allow run-off from fire fighting to enter drains or water courses. Water used for fire extinguishing, which has been in contact with the product, may be corrosive. Containers can burst violently

when heated, due to excess pressure build-up.

5.3 Advice for firefighters

 $\textbf{Special fire fighting procedures} \qquad \qquad \text{If possible, fight fire from protected position. Avoid breathing fire vapours. Ventilate closed}$

spaces before entering them. Containers close to fire should be removed immediately or

cooled with water if safe to do so.

Protective equipment for fire-fighters Fire-fighters should wear appropriate protective equipment and self-contained breathing

apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard

EN 469 will provide a basic level of protection for chemical incidents.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Wear protective clothing as described in Section 8 of this safety data sheet. Provide

adequate ventilation. Eliminate all sources of ignition. Avoid inhalation of vapours and contact with skin and eyes. In case of inadequate ventilation, use respiratory protection. Do not touch or walk through spilled material. If necessary evacuate surrounding areas.

For emergency responders Follow safe handling advice and personal protective equipment recommendations for normal

use of product.

6.2 Environmental precautions

Environmental precautions Do not discharge onto the ground or into water courses. Spillages or uncontrolled discharges

into water courses must be $\ensuremath{\mathsf{IMMEDIATELY}}$ alerted to the Environmental Agency or other

appropriate regulatory body

6.3 Methods and material for containment and cleaning up

Spill clean up methods Stop leak if possible without risk. DO NOT touch spilled material! When dealing with a

spillage, wear necessary protective equipment. Ventilate and evacuate the area. Eliminate all $\,$

ignition sources. Cover drains.

Absorb spillage with non-combustible, absorbent material - sand. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container. Throw sand, ashes or powder cement to absorb the liquid. Neutralise with slaked lime (calcium hydroxide), sodium carbonate, calcium carbonate or

sodium bicarbonate. Floors may become slippery, avoid falls. Use non - metallic

tools/containers for clean up.

6.4 Reference to other sections

Reference to other sections See section 1 for emergency contact. For personal protection, see section 8. For waste

disposal, see section 13.

Section 7: Handling and storage

7.1 Precautions for safe handling

Handling Read and follow manufacturer's recommendations. Use proper personal protection when

handling (refer to Section 8). Do not handle broken packages without protective equipment. Keep away from heat, sparks and open flame. Avoid spilling, skin and eye contact. Do not eat, drink or smoke when using the product. Wash thoroughly after handling. Provide good

ventilation.

7.2 Conditions for safe storage, including any incompatibilities

Storage precautions Keep upright, locked up and out of reach of children. Keep the product in its original

container. Store in cool dry areas away from direct sunlight or sources of ignition. Avoid

contact with oxidising agents.

Storage class Corrosive storage.

7.3 Specific end use(s)

Specific end use(s)The identified uses for this product are detailed in Section 1.2.Usage descriptionUse only according to directions. Replace and tighten cap after use.

Section 8: Exposure controls/Personal protection

8.1 Control parameters

Component	STD	TWA ((8 Hrs)	STEL (1	5mins)	Notes
phosphoric acid	OEL		1 mg/m ³		2 mg/m ³	IOELV
phosphoric acid	WEL		1 mg/m ³		2 mg/m ³	

Ingredient comments Ireland, Occupational Exposure Limits 2020.

WEL - Workplace Exposure Limits - EH40/2005 Workplace exposure limits.

8.2 Exposure Controls

Protective equipment

Engineering measures Provide adequate ventilation, including appropriate local extraction, to ensure that the

defined occupational exposure limit is not exceeded. **Respiratory equipment**Not normally required when used at normal temperatures. If ven

Not normally required when used at normal temperatures. If ventilation is inadequate, suitable respiratory protection must be worn. EN 136/140/145/143/149. Where risk assessment shows air-purifying respirators are appropriate a full face respirator conforming to EN143 should be used, and suitable respirator cartridges as a backup to engineering controls.

Suggested PPE: Combination filter for gases/vapours of organic, inorganic, acid inorganic and alkaline compounds (e.g. EN 14387 Type ABEK). Consult manufacturer for specific advice.

Hand protection Where hand contact with the product may occur the use of gloves approved to relevant

standards (e.g. Europe: EN374) is recommended. (EU Directive 89/686/EEC). Gloves must be inspected prior to use. Suggested material: Polychloroprene (PCP). Rubber (natural, latex) Breakthrough time: >480 minutes. Layer thickness: 0.5 mm. Consult manufacturer for

advice.

Selection of the glove material depends on consideration of the penetration times, rates of diffusion and degradation, and concentration specific to the workplace. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.

Wear safety goggles or face shield to prevent any possibility of eye contact. Use equipment

for eye protection tested and approved under appropriate government standards such as EN 166(EU).

The selected clothing must satisfy the European norm standard EN 943. Personal protective equipment for the body should be selected based on the task being performed and the risks

involved and should be approved by a specialist before handing this product.

Observe normal hygiene standards. Wash promptly if skin becomes contaminated. When using do not eat, drink or smoke. Wash hands after use.

Process conditions Ensure that eye flushing systems and safety showers are located close by in the work place.

Section 9: Physical and chemical properties

Eye protection

Other protection

Hygiene measures

Page 4 of 9

9.1 Information on basic physical and chemical properties

AppearanceClear liquid.ColourDark Blue/Green.

Odour Characteristic, Slight Caustic.

Odour threshold - lower No information available as testing has not been completed.

Odour threshold - upperNo information available as testing has not been completed.

pH-Value, Conc. Solution 1 - 2

pH-Value, Diluted solution Not applicable as the product is a concentrated solution.

Melting point No information available as testing has not been completed.

Initial boiling point and boiling

range

No information available as testing has not been completed.

Flash point Not applicable as the product is not classified as flammable.

Evaporation rate No information available as testing has not been completed.

Flammability state Not applicable as the product is not classified as flammable.

Flammability limit - lower(%) Not applicable as the product is not classified as flammable.

Flammability limit - upper(%) Not applicable as the product is not classified as flammable.

Vapour pressure No information available as testing has not been completed.

Vapour density (air=1) No information available as testing has not been completed.

Relative density $1.10 - 1.20 \text{ kg/l (at } 20^{\circ}\text{C)}$

Bulk density Not applicable as the product is a liquid.

Soluble in water.

Decomposition temperature No information available as testing has not been completed.

Partition coefficient; n-

Octanol/Water

No information available as testing has not been completed.

Auto ignition temperature (°C) Not applicable as the product is not classified as flammable.

Viscosity No information available as testing has not been completed.

Explosive properties Not classified as explosive.

Oxidising properties The product does not meet the criteria to be classified as oxidising.

9.2 Other information

Molecular weight Not applicable as the product is a mixture.

Volatile organic compound No information available as testing has not been completed.

Other information None noted.

Section 10: Stability and reactivity

10.1 Reactivity

Reactivity Reactions may occur with strong oxidizing agents, strong caustic materials and metals.

Reacts with chlorine containing products to release toxic chlorine gas. This solution can react with certain metals, such as aluminum, to generate flammable hydrogen gas.

10.2 Chemical stability

Stability Stable under normal temperature conditions and recommended use.

10.3 Possibility of hazardous reactions

Hazardous reactions Avoid strong oxidizers. Reaction with strong bases. Attacks metals liberating flammable

Hydrogen gas. Reacts with chlorine containing products to release toxic chlorine gas.

Hazardous polymerisation Will not polymerise. **Polymerisation description** Not applicable.

10.4 Conditions to Avoid

Conditions to avoid Heat, sparks, open flames, temperature extremes and direct sunlight. Water, moisture.

10.5 Incompatible materials

Materials to avoid Keep away from strong reducing agents. Metals. Bases. Do not mix with other chemicals

unless listed on directions. Hazardous reaction in aqueous solution may occur with chlorine,

hypochlorous acid, hypochlorites, cyanides or sulfides.

10.6 Hazardous decomposition products

Hazardous decomposition products Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or

vapours. At high temperatures, possible formation of phosphorous oxides.

Section 11: Toxicological information

11.1 Information on toxicological effects

Toxicological information No toxicological information for the overall finished product.

Acute toxicity (Oral LD50)

Acute toxicity (Dermal LD50)

Acute toxicity (Inhalation LD50)

No information available as testing has not been completed.

No information available as testing has not been completed.

Serious eye damage/irritation Causes serious eye damage.

Skin corrosion/irritation The product is classified as a skin corrosion/irritation hazard.

Respiratory sensitisationThe product is not classified as a respiratory hazard. **Skin sensitisation**The product is not classified as a skin sensitisation hazard.

Germ cell mutagenicity The product is not classified as a mutagen.

Carcinogenicity The product is not classified as a carcinogen hazard.

Specific target organ toxicity - Single exposure:

STOT - Single exposure The product is not classified as a single exposure specific target organ toxin.

Specific target organ toxicity - Repeated exposure:

 $\textbf{STOT-Repeated exposure} \qquad \qquad \text{The product is not classified as a repeat exposure specific target organ toxin.}$

Inhalation May cause respiratory irritation.

Ingestion Ingestion can cause pain and irritation or burns of the mouth, throat, oesophagus and

gastrointestinal tract.

Skin contactCorrosive! Can cause redness, pain, and severe skin burns.Eye contactCorneal burns may occur. May cause permanent damage.

Waste management When handling waste, consideration should be made to the safety precautions applying to

handling of the product.

Routes of entry Eyes, skin, ingestion or inhalation.

Target organs Eyes, skin, digestive system, respiratory system.

Aspiration hazards: The product is not classified as an aspiration hazard. **Reproductive toxicity:** The product is not classified as a reproductive hazard.

Name	LD50 oral	LD50 dermal	LD50 inhalation
phosphoric acid	1530.00mg/kg Rat		

Section 12: Ecological information

12.1 Toxicity

Acute toxicity - Fish No information available as testing has not been completed. Acute toxicity - Aquatic invertebrates No information available as testing has not been completed. **Acute toxicity - Aquatic plants** No information available as testing has not been completed. **Acute toxicity - Microorganisms** No information available as testing has not been completed. **Chronic toxicity - Fish** No information available as testing has not been completed. **Chronic toxicity - Aquatic** No information available as testing has not been completed.

invertebrates

Chronic toxicity - Aquatic plants Chronic toxicity - Microorganisms

Ecotoxicity

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment. The product may affect the acidity (pH-factor) in water with risk of harmful

No information available as testing has not been completed.

No information available as testing has not been completed.

effects to aquatic organisms.

Eco toxilogical information No ecological toxicity available on the overall finished product.

12.2 Persistence and degradability

Degradability The degradability of the product has not been stated. Biological oxygen demand No information available as testing has not been completed. Chemical oxygen demand No information available as testing has not been completed.

12.3 Bioaccumulative potential

Bioaccumulative potential No data available on bioaccumulation.

Bioaccumulation factor No information available as testing has not been completed. Partition coefficient; n-No information available as testing has not been completed. Octanol/Water

12.4 Mobility in soil

Mobility Soluble in water.

12.5 Results of PBT and vPvB assessment

Results of PBT and vPvB assessment The product does not contain any PBT or vPvB Substances.

12.6 Other adverse effects

Other adverse effects None known.

Section 13: Disposal considerations

Waste management When handling waste, consideration should be made to the safety precautions applying to handling of the product.

13.1 Waste treatment methods

Disposal methods Dispose of waste and residues in accordance with local authority requirements. For waste

disposal, use a licensed industrial waste disposal agent.

Section 14: Transport information
